FPT University Grading Editor 1.0 (FUGE) – User manual

Overview

FUGE is a small tool that used by FPT University's teacher to edit on going assessment marks (lab, quiz, assignment,...). The output of FUGE is a .fg file in which all marks are stored. The file is protected by password and encryption. The output of FUGE is a .fg file that used by Examination Dept to import to grading system and fap.fpt.edu.vn website.

The benefits of FUGE:

- Ensure marks given by teacher cannot be changed by others
- Teacher do not need to sign the hard copy of mark sheet (reduce the papers used, and paperwork)

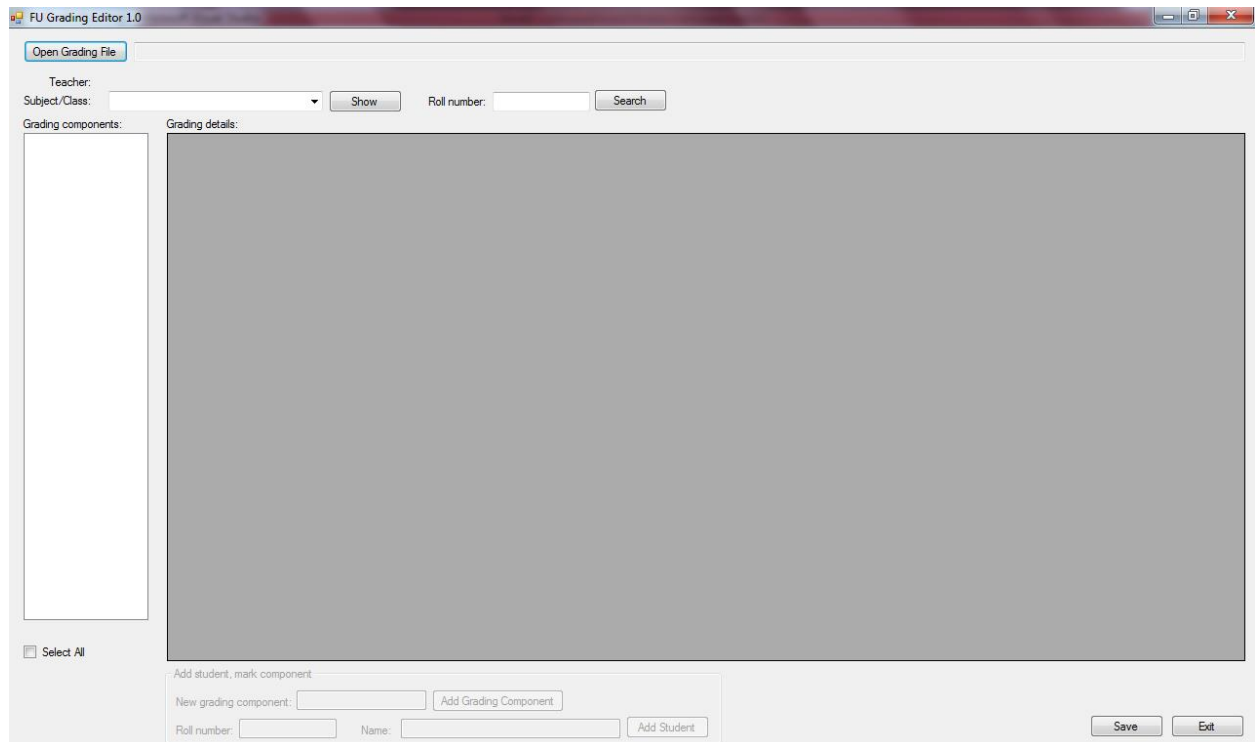

To use the tool, you do the following steps:

- 1) Download FUGE from fap.fpt.edu.vn website
 - Open fap.fpt.edu.vn
 - In the "Others" part, click on "Download grading tool (FUGE)" to download FUGE (FUGE.zip)
 - Unzip FUGE.zip
- 2) Download the <loginName>.fg file from fap.fpt.edu.vn. The file contains student lists and mark components (lab, assignment, quiz,...) of all the classes you are teaching in the current semester.
 - Open fap.fpt.edu.vn
 - In the "Others" part, click on "Download grading file (.fg)"
- 3) Edit marks:
 - Input mark student by student
 - Copy a mark sheet from Excel and import to FUGE
- 4) Save the marks (the marks are saved in <loginName>.fg file). At the first time saving, a password to protect the file is requested by FUGE. You should keep the password to open the file in the next time. Without password, .fg file cannot be opened!

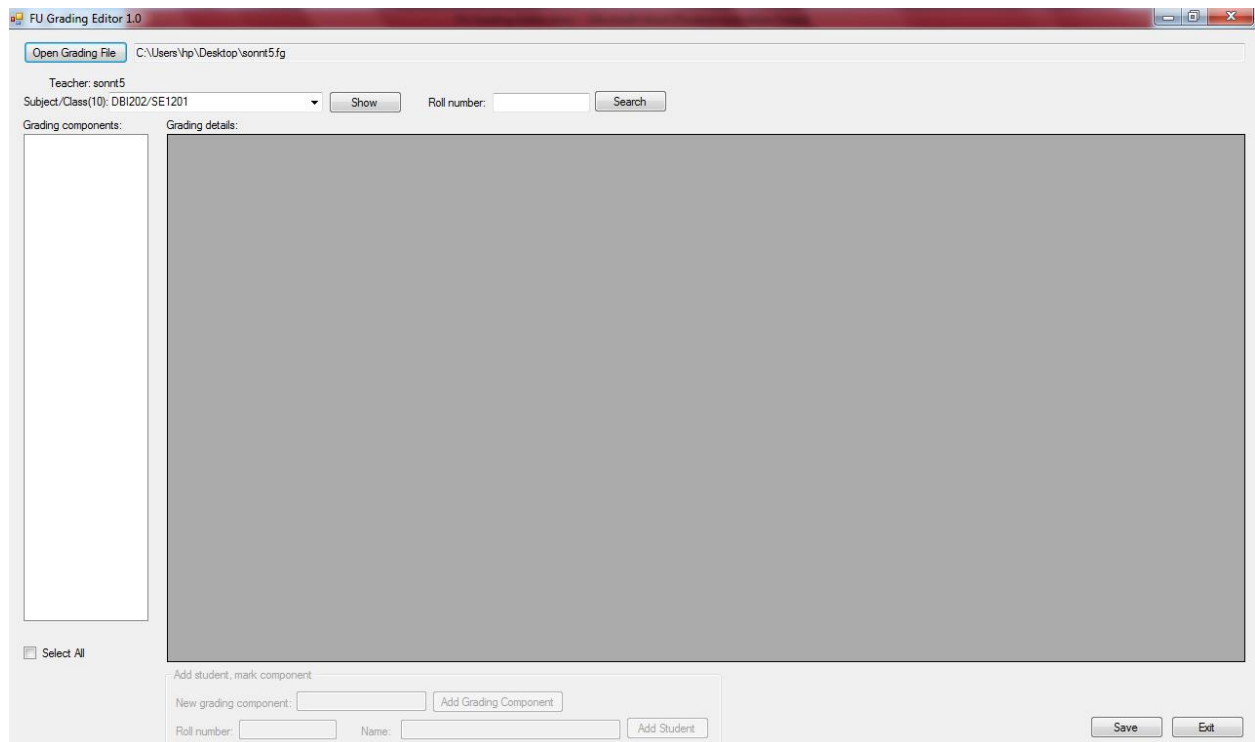

Edit marks using FUGE

- 1) Run FUGE
FUGE program is packaged in FuGrade.exe file.

Main screen

- 2) Open .fg file:
Click "Open Grading File" to open .fg file.

- 3) Choose subject/class to edit marks

Select the subject/class you teach in the combo box “Subject/Class” then click button “Show”. FUGE displays the list of mark components in “Grading components” of the subject, list of students in “Grading details”.

Add student, mark component

New grading component:

Roll number: Name:

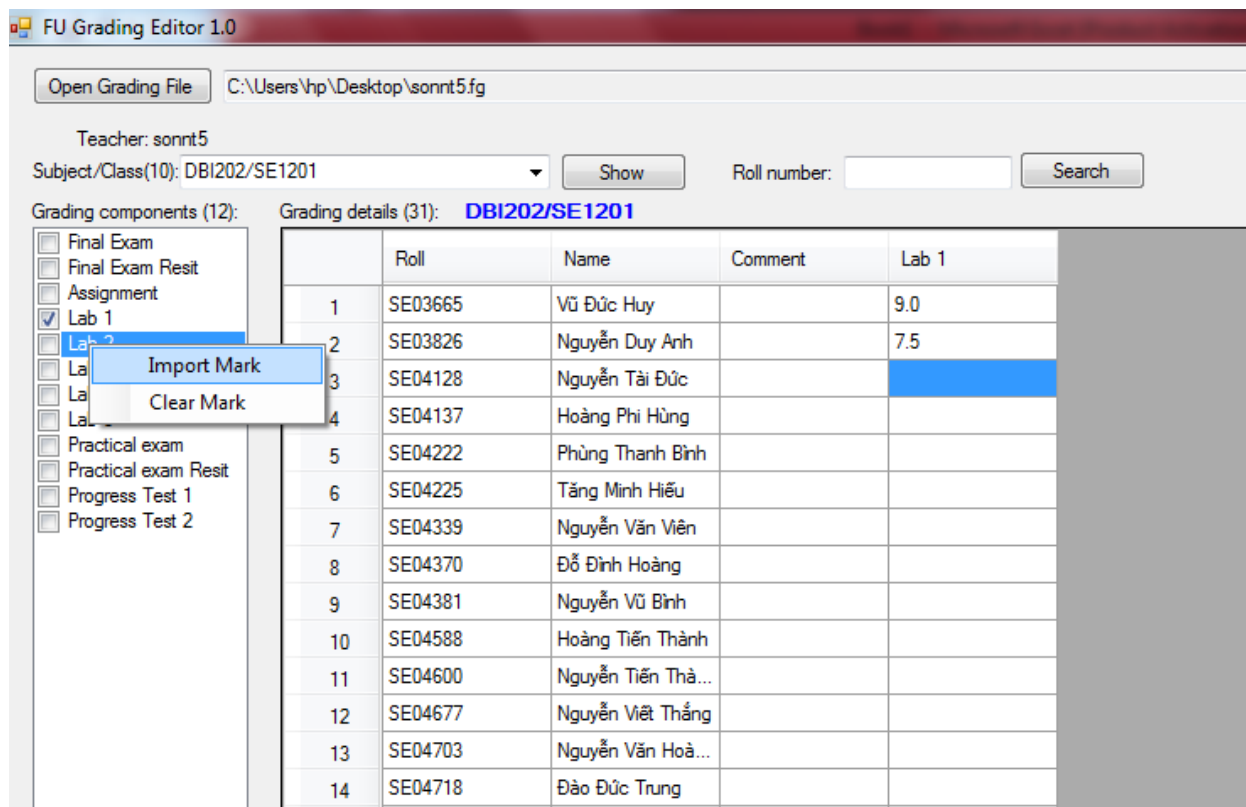

4) Input a mark

Select a grading component (by checking on a grading component) and type the mark into the selected cell (blue color) of “Grading details”.

5) Import a mark sheet

- Right click on grading component

- Select “Import mark”

Import Mark

Subject/Class: DBI202/SE1201 **Mark component: Lab 2**

Paste marks here:

Roll	Mark/Comments
------	---------------

Importing log:

☐ Exclude the first row

 Search (roll or mark):

- Copy a mark sheet from Excel and paste to the left textbox. You can import only one mark component at a time. The first column is student’s roll number and the second one is mark value. If the first row is the mark header, select “Exclude the first row” checkbox to exclude it.

Import Mark

Subject/Class: DBI202/SE1201 Mark component: Lab 2

Paste marks here:

Add student, mark component

New grading component:

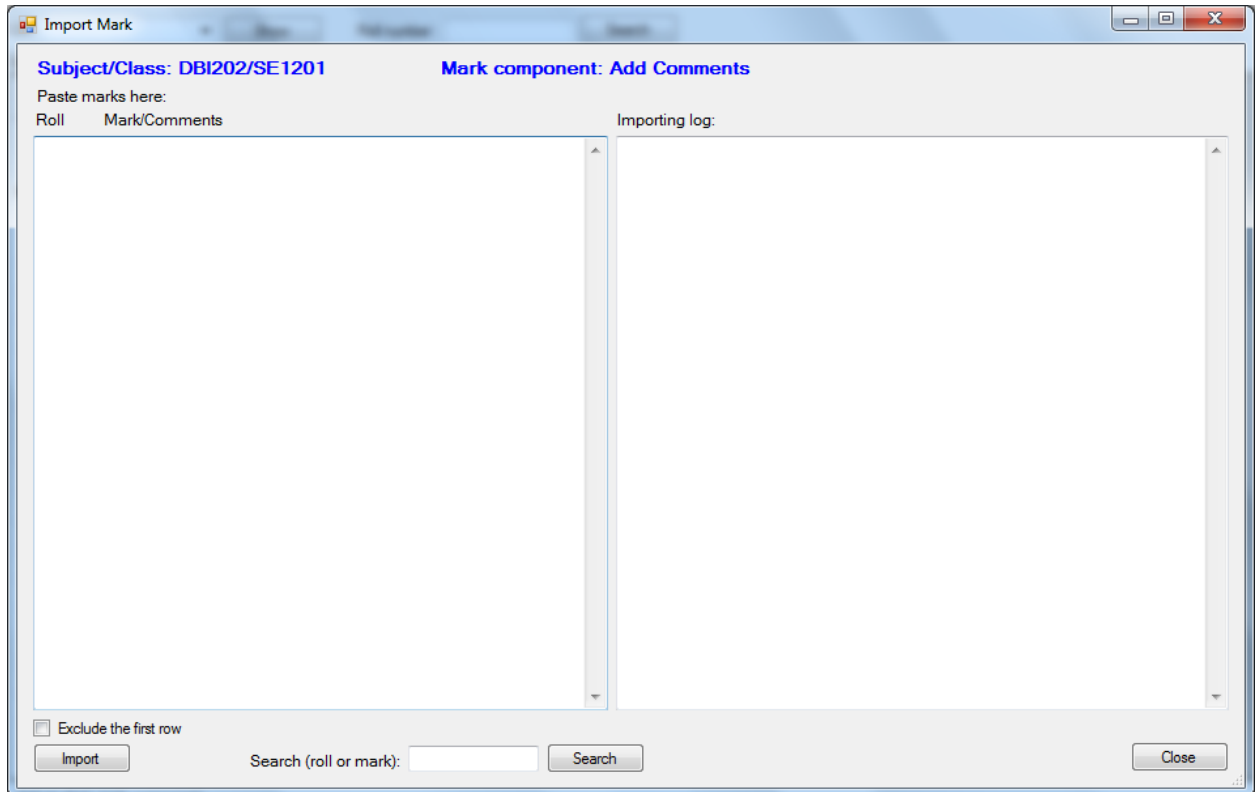

Roll number: Name:

- Click “Save” to save the marks. The marks are saved into the same .fg file you opened in step 2.

Edit comments

There are two ways to add comment to grading details.

- 1) You can edit “Comments” in grading details by typing directly into the cell
- 2) Import comments
 - Click button “Import Comments” on the FUGE main screen

- Copy comments from Excel and paste to the left textbox. The first column is student’s roll number and the second one is comment details.

Import Comments Save Exit

Clear marks

You can clear a mark column in “Grading details” by doing the following steps:

- Right click on grading component

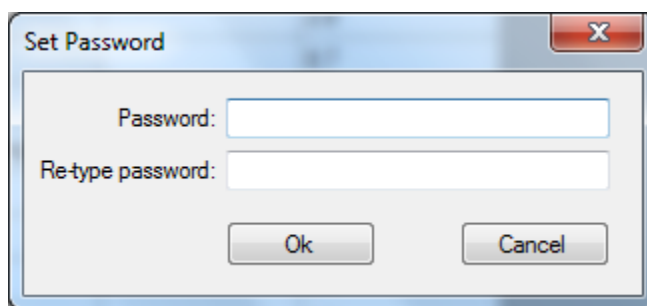

- Select “Clear Mark”

Save the .fg file

Click “Save” button.

If the first time you save .fg file, FUGE displays Set Password screen.

The password is used to prevent the others opening the file. It means, when you open a .fg file with password is set, you must provide the valid password.

Edit the grade (pass/fail)

It is used for grading the students in pass/fail status (LAB101, LAB211,... subjects). “Status” is only one grading component in this kind of subject.
